Use Determination & Reco	_
	since November 28, 1975?
	UAA survey was conducted in May 2007 and no WBCR was observed.
	nterviews were conducted during the survey. No evidence of SCR was
obse	erved during this or any previous survey.
Is the evaluated use	e attainable?
	stream met the maximum depth criterion at 3 of the 8 sites evaluated.
Due to the W secon	to meeting the maximum depth criterion, the committee recommends
	WBCR use designation be assigned. Due to the lack of evidence of
	ndary contact, data in this UAA supports the 2005 Water Quality
	dards where the SCR use designation was not assigned.
